

Connect the device to the TV and then to your WIFI Connection:

Connect the Mouse's USB piece to the end of the Device USB port / Slide the Red Antenna out / Connect the HDMI side of the device to the TV's HDMI1 Port / Connect the USB Side of the Device to the TV's USB Port

When the device boots, it will show a loading screen
Go to the right top corner and drag your mouse down, a menu will appear
You will click on the "Exit DMB", you will use the password: "Faris"

Go to "Launcher" and click Just once
Go to the dotted circle on bottom of screen
Then you will go to the Android settings

Now setup the your WIFI Connection
Once it shows "connected" and only then, Click on the house looking shape on bottom right.
Go to "DMB" and click Always
TURN TV OFF AND THEN BACK ON, it will take a few, abut it will download the new page and refresh.

This is timed, it may take a few tries before you get it, will get easier with the next device.

The device is already setup with the FTP Username & password,
All you need is connect the Device to your WIFI login and Password
you can email me if you have any questions....
